Looking for work

Hi every body

I hope it's the right place & I'm not offending any body.

I'm a veteran Mumps/Cache/Ensemble programmer . I think my only draw back is my age, although my brain is still young & bubbly.

I'm looking a long time for work without success.

I gathered a lot of knowledge & experience during those long years , developed many projects & i'm ready to do any work only to feel useful.

I'll add my resume, I hope & wish that this post will bring some change as I'm desperate to get some work.

Thank you very much Simcha my email is shiluvg@gmail.com

Covering letter

Good day

My name is Simcha Gershon & I'm from Israel

I'm an old IT veteran , during my lifetime I have had an opportunity to acquire a huge amount of knowledge & experience in the IT area , inclusive of all aspects & stages, analyzing , designing, programming , utilizing , managing & maintaining, including Legacy software, specialized or functional.

My prolific military background taught me discipline, responsibility and team work.

I believe that although my advanced age I have a huge amount to donate to any organization that will hire me, in knowledge, experience, loyalty , devotion insight & vision.

Thank You Simcha

Recommendations :

Shree Mohan - Intersystems UK

https://www.linkedin.com/in/shree-mohan-a3236312/

Tani Frenkel - Intersystems Israel
