%CacheObject on Iris - SOLVED

Hi all,

We are moving to IRIS our productions, and everything seems to go fine. But we are facing a problem because we are using the object %Library. CacheObject in some classes, and IRIS doesn't seem to recognize it. At the IRIS documentation (https://docs.intersystems.com/irislatest/csp/documatic/%25CSP.Documatic.cls) the object is effectively removed, and I can't find the equivalent.

Has anyone faced this? Which is the new object in IRIS?
