New Video: Continuous Delivery with Containers

Hi Community!

Please welcome a new video on [InterSystems Developers YouTube Channel](#):

[Continuous Delivery with Containers](#)

This video demonstrates the “ Build ” phase of a DevOps approach with containers. Starting with an existing app, we will check in some new code, rebuild the app using a web-based CI/CD tool to run a Docker build process, re-provision the app, and show the new version. To get the most from this session, attendees should be familiar with Docker containers.

Takeaway: By leveraging containers, I can reap the benefits of a faster and more efficient provisioning pipeline.

Presenter: [@Eduard Lebedyuk](#)

Additional materials to the video you can find in this [InterSystems Online Learning Course](#).

And...

You are very welcome to watch all the videos from Global Summit 2018 in a [dedicated Global Summit 2018 playlist](#) on [InterSystems Developers YouTube](#).

Enjoy and stay tuned!
