## Special Char % in SQL Query

Hello everyone,

I try excuting a SQL Query like this `SELECT ID, CompanyName FROM Company WHERE CompanyName LIKE 'condition'`

But if I want to search CompanyName have special char %, ex: '100% Co' , 'Group of Mr.%', 'The %TaxProp'...

How can I take % to query, with

`SELECT ID, CompanyName FROM Table1 WHERE CompanyName LIKE '%%%'`

it'll get all record in table.

Someone give me an idea. Thanks so much!
