InterSystems Developer Community Digest, November 2018

Greetings, Developer Community Member!

Here is the digest of the most interesting and valuable posts on Developer Community published in November 2018.

Most viewed

- [New release cadence for InterSystems IRIS](#) 302
- [Abnormal programming with InterSystems](#) 217
- [Language features that you really should know from day 1](#) 215
- [What is best approach to parsing CSV string to tab-delimited string?](#) 207
- [How do You Convert 8-bit Database to Unicode?](#) 141
- [InterSystems IRIS 2018.2 available in preview](#) 139
- [How to get running operating system](#) 122
- [ObjectScript: Looping over a multidimensional global value and comparing](#) 119
- [Syntax highlighting for ObjectScript](#) 119
- [Detection of last update timestamp of each class row \(DSTIME ?\)](#) 117
- [Data Verifier for InterSystems Data Platforms](#) 104
- [Uploading and downloading files via http](#) 99
- [Fetch Message Header Data](#) 62
- [Utility to compare class and include file definitions between builds](#) 55

[Utility to compare class and include file definitions between builds](#)

[What is best approach to parsing CSV string to tab-delimited string?](#)

[Create a Zen Page using an ObjectScript class method](#)

[Caché exTreme for .NET - direct access to globals from](#)

	C# : An attempt was made to load a program with an incorrect format. (Exception from HRESULT: 0x8007000B)
Routine that converts indices to bitmap indices	Pattern Match with Cache
Abnormal programming with InterSystems	Detection of last update timestamp of each class row (DSTIME ?)
Syntax highlighting for ObjectScript	LDAP and Multiple Servers/Namespace
Language features that you really should know from day 1	How to get Custom Header added during a request to Cache
Pagination with filters	Hibernate 5 Cache71Dialect
	How to get running operating system
	Json with field exceeding maximum string length
	Dynamically Creating Class (Reflection in C#)
	Managing with heavy databases
	Upload file attachments (pictures, documents and videos...) HTML AND CACHE INTERSTEMS
	Composite Primary key in Parent Child relationship table.
	Upload File in server
	How to get DB and global location information?
	writing to event log in a custom process
	SQL calculated property rollback
	Detecting Source Code Change?
	Update existing objects from XML
	Zen Datagrid save to table
	JSON Syntax
	How to cause JSONOBJECT to not transform %String fields into JSON? (Leave escaped)
	Is there any way to access property from another string?
	Pass value from combobox to the altJSONSQLProvider TO update datagrid.
	How to XML project a Boolean/Integer property as an empty element
	Text session workstation id
	Embedded SQL bug?
