New Video: Advanced Cloud Provisioning & Deployment

Hi Everyone!

New session recording from Global Summit 2018 is already on [InterSystems Developers YouTube Channel](#):

[Advanced Cloud Provisioning & Deployment](#)

This video provides a more detailed look at InterSystems Cloud Manager (ICM), focusing on deploying applications in a production environment. We will consider management and ICM configuration, and issues of latency, data security, data locality, service discovery usage, LDAP integration, VPN connectivity from your infrastructure, and more. To get the most from this session, attendees should be familiar with the basics of ICM and containers.

Takeaway: I understand how to use InterSystems Cloud Manager to deploy my applications in a production environment.

Presenters: [@Murray Oldfield](#) and [@Luca Ravazzolo](#)

Big applause to these speakers, thank you guys! 

In addition, please check [InterSystems Online Learning Course](#).

What's more?

You are very welcome to watch all the videos about ICM in a [dedicated InterSystems Cloud Manager playlist](#) on [InterSystems Developers YouTube](#).

Enjoy and stay tuned!
