New Video: Coding Advent of Code 2018 with InterSystems ObjectScript in Visual Studio Code

Hi Community!

We try a new approach to the [InterSystems Developers YouTube Videos](#) called "Coding Talks"!

Coding Talks is a short video in which the developer demonstrates a particular feature or functionality of InterSystems Data Platforms which he/she uses to in coding. Typical format: the face on side and editor with ObjectScript.

Check this video I made by myself participating in Advent of Code 2018 and coding with InterSystems ObjectScript in VSCode.

[Coding Advent of Code 2018 Using InterSystems ObjectScript](#)

You're very welcome to share your ideas in the comments of this post!
