## New Video: API Design for REST

Hi Community!

New video is already on [InterSystems Developers YouTube](#):

[API Design for REST](#)

In this video, we will demonstrate the benefits of an “ API-first ” approach for REST. Starting with a spec (which can be created using swagger or our own user interface), our REST tooling can generate all the server-side code for you.

Takeaway: InterSystems REST tooling allows me to design and deploy rest APIs efficiently, making it easy for other developers to consume my server-side business logic.

Presenter: [@Michael Smart](#)

Additional materials to the video you can find in this [InterSystems Online Learning Course](#).

And...

Dont forget to subscribe our [InterSystems Developers YouTube Channel](#).

Enjoy and stay tuned!
