Atelier Update Site Domain Change

The Atelier update site domain has changed from artifactoryonline.com to jfrog.io. JFrog Artifactory Cloud has deprecated the artifactoryonline.com domain in favor of jfrog.io. See [their announcement](#) for more details.

We've made these changes available from the beta channel for your convenience. Simply get latest updates from <https://atelier.jfrog.io/atelier/updates/beta/latest/> and the deprecated URLs should be replaced with active ones.

These changes will be included in the upcoming stable update this Spring 2019 as well.

Please visit our [release notes page](#) to learn more about the contents of this update.
