Regarding Chat box

Hi Team,

Our community is most useful for my learning. I have one concern. We need to add a chat box for discuss and interact with other developer in our community . It is most useful for maintaining the team relationship and sometime we get guidance from anyone on directly. I known already we have the chat box in global master(that chatbox just we send greetingsrelated messages only). This same one is need for our community also(All are reading articals and question on our community page).So I am asking chat box on our community page also.

Thanks & Regards,

Ponnumani Gurusamy.
