## How to set Content-Type header in http outbound adapter. It always sends the content-type as plain text/html.

How to set Content-Type header in http outbound adapter. It always sends the content-type as plain text/html. I am uploading a image / Pdf.

Class TEST.BusinessOperation.SaveFile Extends Ens.BusinessOperation

{

Parameter ADAPTER = "EnsLib.HTTP.OutboundAdapter";

Property Adapter As EnsLib.HTTP.OutboundAdapter;

Parameter INVOCATION = "Queue";

Method SaveFile(pRequest As Messages.File, Output pResponse As Messages.SaveFileResponse) As %Status

{

set fileName = pRequest.fileName

set Content = pRequest.fileContent

set tSC = ..Adapter.PutURL(URL,..HttpResponse,"",Content.Read())

}

}
