Support for gender code "U" in Healthshare

Does InterSystems Ensemble support (for LGBTQ+) gender code "U" in Healthshare? Specifically for the clinical (or physician) viewer?

Test shows the gender code is consumed without error and stored, but the viewer does not present it except (as far as I can see) in the patient search drop-down.

The 2.3.1 HL7 ADT schema code table lists "U" as a supported option.

Would this require customization in the viewer code to support this?

[#HL7](#) [#Ensemble](#) [#HealthShare](#)
