What's new in this version

Title update

It is a tool that visualizes the structure of Caché classes as a diagram, shows dependencies between classes and all relevant information, including the methods code, queries, xData blocks, comments, documentation and keywords of various class elements.

Screenshots

Also, you can add screenshots which to highlight the key features of your app. Just click on Add Screenshot and upload it from your laptop. Users then can see it [like in this application](#)
