[March 26, 2019] Upcoming Webinar: Machine Learning Toolkit (Python, ObjectScript, Interoperability, Analytics) for InterSystems IRIS

Hi Community!

We are pleased to invite you to the upcoming webinar "[Machine Learning Toolkit \(Python, ObjectScript, Interoperability, Analytics\) for InterSystems IRIS](#)" on 26th of March at 10:00 (Moscow time)!

We will talk about ML Toolkit - a set of functional extensions for mathematical modelling for InterSystems IRIS data platform.

The following topics would be discussed:

- IRIS as a driver for mathematical modelling environments (Python, etc.);
- IRIS as an application development platform for mathematical modelling (native library of algorithms);
- IRIS Interoperability as a designing environment for adaptive analytical processes;
- IRIS Analytics as an environment for visualization of the mathematical algorithms results;
- ML Toolkit usage scenarios.

Audience: The webinar is designed for Python/ObjectScript Developers, Data Scientists and Data Engineers.

Note: The language of the webinar is Russian.

We are waiting for you at our webinar! [Register for free now!](#)
