SQL Developer Experience survey

Hi all,

In order to prioritize functional requirements for evolving our SQL developer experience, we have prepared a short survey to better understand how you 're currently using and, in an ideal world, would like most to interact with our SQL platform.

<https://www.surveymonkey.com/r/DSY6YT2>

Don ' t hesitate to forward this survey informally to your peers you know are accessing our SQL engine on a regular basis. There ' s a disclaimer at the top that indicates we are highly interested in feedback to drive our roadmap, but obviously cannot commit to implementing all of it.

The survey is anonymous, but if you have really great suggestions, feel free leave your name at the end in case we decide to award prizes ;-)

Many thanks in advance for your feedback!
benjamin
