# Problem starting production

Hope someone can help me, so i was developing a script and during the tests I was using the csession to execute a method. Also i thought i had to stop the instance i was using, so I used the ccontrol stop [instanceName] to stop the instance, but when i restarted the instance i got this error trying to start my production, I have an idea of what's the problem but i don't know how to fix it.

```
ERRO <Ens>ErrorException: <FILEFULL>zStartProduction+62^Ens.Director.1 ^Ens.Runtime("Name"),/hs-connect-hom/db/BPINTEGRADEV-GLB/ -- - registrado no log como '-' número - '@'
Set ^Ens.Runtime("Name")=pProductionName'
```
