Meet InterSystems Developer Community on LinkedIn!

Hey Community!

As you know, InterSystems Developer Community is always evolving. We have a number of different pages in popular social networks. And now we're more than happy to launch the InterSystems Developer Community on LinkedIn! Please welcome:

1. [Developer Community Page on LinkedIn](#): to stay in the know about articles, answers, announcements, hot discussions, best practices based on InterSystems technology - so good if you are an active user of LinkedIn!

2. [InterSystems Developers Group on LinkedIn](#): to network with other developers. Imagine that you want to invite a high-pro DC member to your event, or you have a question or need advice... How to contact him/her? Now it's easy! Go to DC LinkedIn Group and send a direct message!

What's next?

We are planning to expand. What do you think about it?

In what social networks do you want to see Developer Community? Please leave all your suggestions in the comments of this post.

Enjoy and stay tuned! 👍
