How to add a Translation in Spanish for an Article on DC

Hi Community!

You've possibly noticed ES switcher in articles.

If not - we recently introduced the option to switch to the Spanish version of the article.

Everyone is able now to add a translation to an article on the Developer Community.

If you want to add a translation request author's permission on the articles page in a Translation tab.

If the author grants the request you are able to publish the translation with your name on the Spanish Community site. Spanish Community is operating in a "beta version" mode.

if you are an author you receive the notification by email about the request from a particular DC member. It's your decision whether to grant it.

[The Example of an English article.](#)

[The Example of a translated Spanish article.](#)

If you want to translate your own article request the permission from yourself and grant it)

The same thing works for [Spanish Community site](#) - you can translate the Spanish article in English. Be sure, you know both languages well!)

Looking forward to see your articles in Spanish and stay tuned for the official launch in May 2019
