New Video: Developing with Docker and InterSystems IRIS Community Edition

Hi Community!

You're very welcome to watch a new video on InterSystems Developers YouTube, recorded in a new format called "Coding Talks":

Developing with Docker and InterSystems IRIS Community Edition

In this video, presented by @ Evgeny Shvarov, you will know how to develop InterSystems IRIS solution on ObjectScript using Docker with example of dockerised InterSystems IRIS repository.

Read how to dockerize your repo here.

And...

A little bit about our new video format: Coding Talks is a short video in which the developer demonstrates a particular feature or functionality of InterSystems Data Platforms which he/she uses to in coding. Typical format: the face on side and editor with ObjectScript.

So!

Enjoy watching the video and you're very welcome to share your own ideas/themes for our new video format in the comments to this post!

Stay tuned! 👍
