Recommended resources for learning FHIR and SMART on FHIR?

Hi,

Most of my development experience is with HL7v2 interfaces and I don't have a background in web development and I'm very weak with javascript.

I'm looking for suggestions of learning resources to learn FHIR and 'SMART on FHIR' (JavaScript, OpenID connect, OAuth2) for developers like myself who mostly do HL7v2 integrations - but see FHIR as the future - and want to develop their skills!

I've found these

- http://docs.smarthealthit.org/
- http://docs.smarthealthit.org/tutorials/javascript/
- https://github.com/smart-on-fhir/sample-apps-stu3/tree/master/medications-standalone

Please respond if you found any resourses that helped you in learning FHIR and SMART on FHIR (javascript/FHIR/OpenID Connect/OAuth2)

TIA,

Stephen
