InterSystems Developers in Spanish!

Hi Community!

I'm pleased to announce the official start of [InterSystems Developer Community in Spanish!](#)

Here is the landing page which describes the thing:

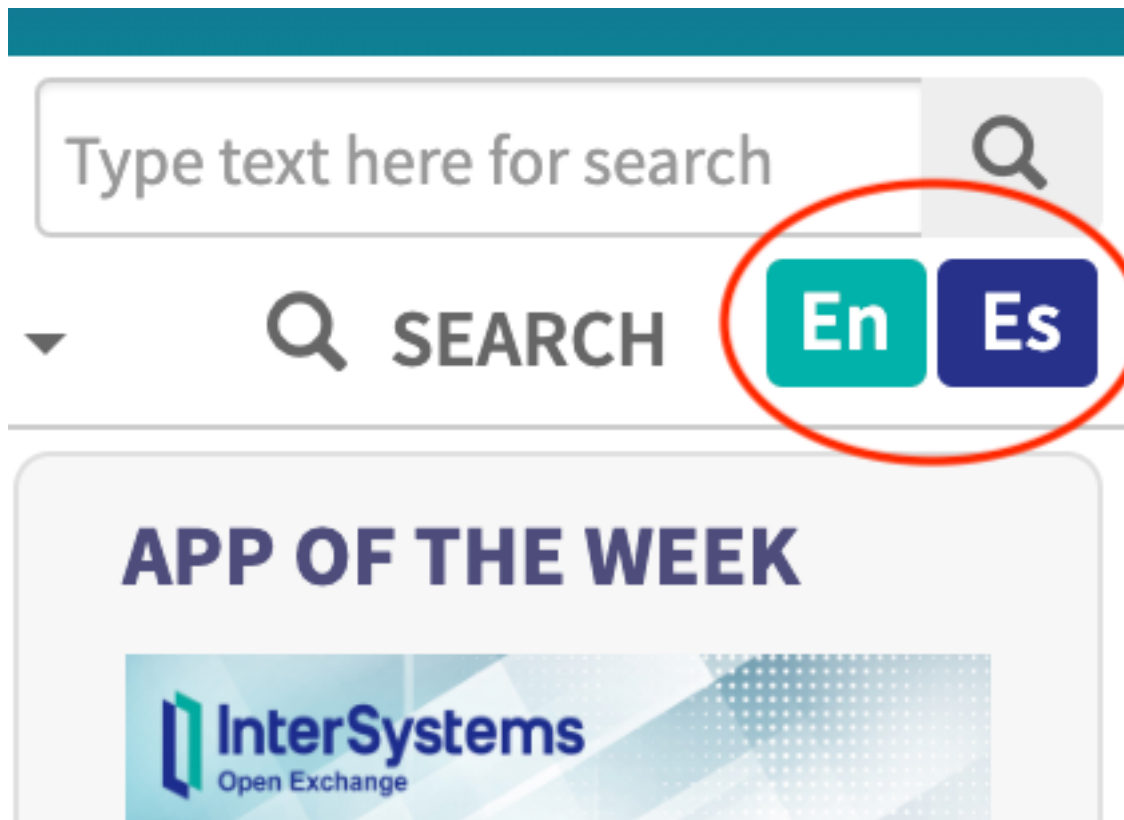

Ahora nuestra comunidad
también habla español.

Do you speak Spanish?
¡HOLA!

Descubre todas las novedades ▾

Also, you can switch between sites using two language buttons in the top right corner.

So!

If you know Spanish welcome to contribute articles, discuss articles and answer questions about InterSystems data platforms [now in Spanish too!](#)

Also!

If you posted an article in English it could be translated by anyone in Spanish and will be helpful for even more people! [Check the translation guide.](#)

And! You can expand the audience and translate your question into another language - just click the "Es" switcher in your English question and proceed with translation - the translated question will be generated in another language. For Example:

? How to Create SSL Configuration Programmatically?

Deployment, SSL, InterSystems IRIS

Hi Community!

How do you create SSL Configuration for InterSystems IRIS programmatically? E.g. for installation or deployment case?

And let me introduce you [@David Reche](#) from [InterSystems Iberia office](#) as creator and now as a manager of InterSystems Developer Community in Spanish!

Don't hesitate to provide your feedback to David how to make Spanish InterSystems community better!

Welcome to InterSystems Developers Community in Spanish, and stay tuned!
