# Send request to BP on production start

How do I send request on production start?

Here's what I got so far in my production class:

```
ClassMethod OnStart(pTimeStarted As %String) As %Status
{
    job ..InitialTraining()
    quit 1
}

classMethod InitialTraining() As %Status
{
    hang 5
    set sc = ##class(EnsLib.Testing.Service).SendTestRequest(...)
    quit sc
}
```

Is there a better way without hang, etc?
