VSCode Extension for ObjectScript 1000 installs

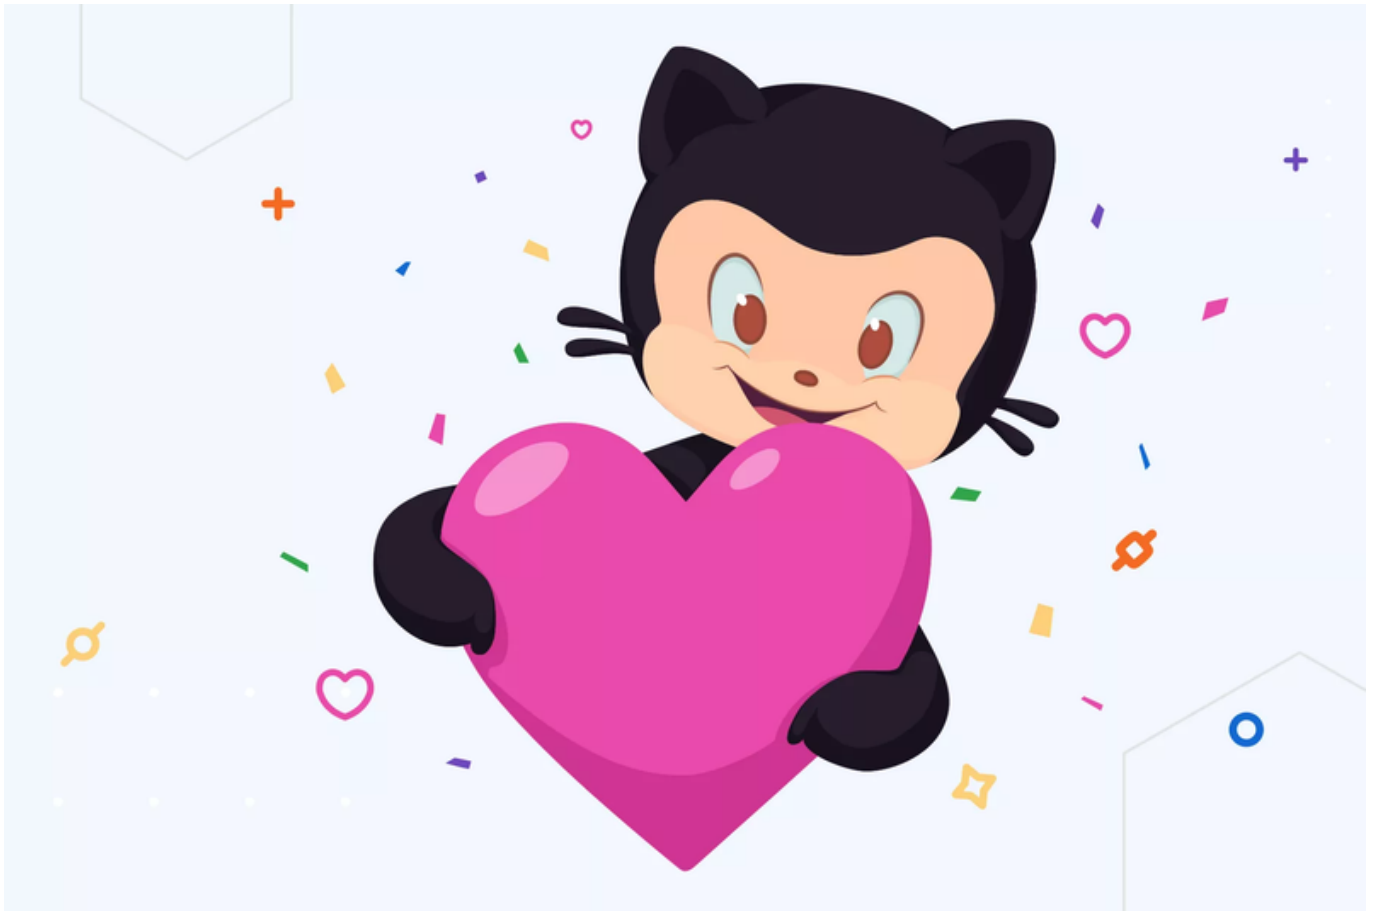

My [extension](#) has recently reached first 1000 installations. And thank you all of you, who use it and fill issues and even contribute to the project.

The screenshot shows the extension marketplace entry for 'InterSystems ObjectScript'. On the left is the Visual Studio Code logo (VS in a circle). To the right, the extension name 'InterSystems ObjectScript' is displayed in bold, with a red 'Preview' badge to its right. Below the name, the author 'Dmitry Maslennikov' is listed, followed by statistics: '1,111 installs', '2,019 downloads', a 5-star rating with '(1)' review, and 'Free'. The description reads 'InterSystems ObjectScript language support for Visual Studio Code'. At the bottom, there is a green 'Install' button and a link 'Trouble Installing?' with an external link icon.

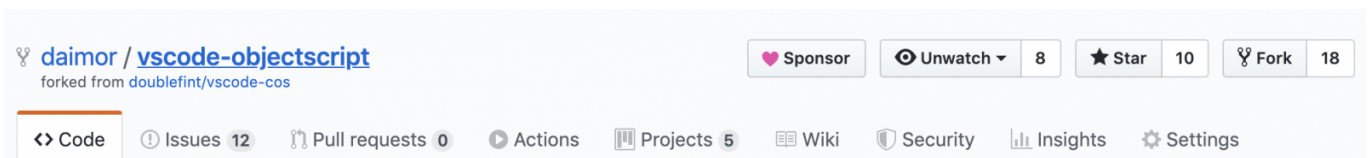

The latest version of the extension already has more not yet announced features. I'm going to make this announcement later.

Sometime ago GitHub announced their new feature - [sponsoring](#) OpenSource projects stored on GitHub.

I would like to invite you to donate to the project if you found it useful for you or just wanted to support it.

You can do it by clicking the new Sponsor button appeared on [GitHub](#).

Fill free to contact me directly, if want other donation options.
