## InterSystems IRIS 2019.2 released

The 2019.2 version of InterSystems IRIS Data Platform is now Generally Available!

Container images for InterSystems IRIS are available via the WRC's [download site](#).

The build number for these releases is 2019.2.0.107.0.

InterSystems IRIS Data Platform 2019.2 is the first CD (continuous delivery) release of InterSystems IRIS. It has many new capabilities including:

- Addition of the IRIS Native API for Python and Node.js and relational access for Node.js
- Simplified sharding architecture and flexible sharded schema design
- Support for the new PowerBI connector for InterSystems IRIS
- New look in the Management Portal
- System security, performance, and efficiency enhancements
- Enhancements to the InterSystems Cloud Manager

These are detailed in the InterSystems IRIS 2019.2 [documentation](#) and [release notes](#).

As this is a CD release, it is only available in OCI (Open Container Initiative) a.k.a. Docker container format. The platforms on which this is supported for production and development are detailed in the [Supported Platforms document](#). For more information on what a CD release is, review the [new release cadence](#) post on InterSystems Developer Community.
