InterSystems Open Exchange Release, June 2019

Hi Community!

We have a new release of InterSystems Open Exchange applications gallery!

What's new?

- Companies catalog
- Better descriptions
- Application Preview

See the details below.

Companies catalog

As you already know you are able to introduce a [Company profile](#) and publish apps on behalf of a company.

In this release, we introduced a [catalog of companies](#) presented on Open Exchange.

Please, add your companies and get more traffic to your company sites and applications!

Better descriptions

We have two descriptions for the app.

A short description is mandatory and is being used to display on app tile and to be displayed if you don't have a long description.
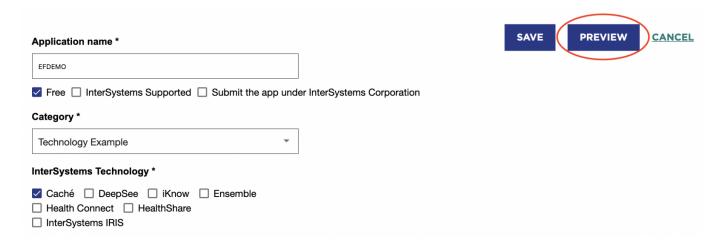

With this release, a short description may be imported from Github repo linked to the app.

Long description now supports markdown - so formatting, links, images are welcome!

If your app is connected to a Github repo long description can be loaded from Github readme.md. This behavior could be altered by a special flag now.
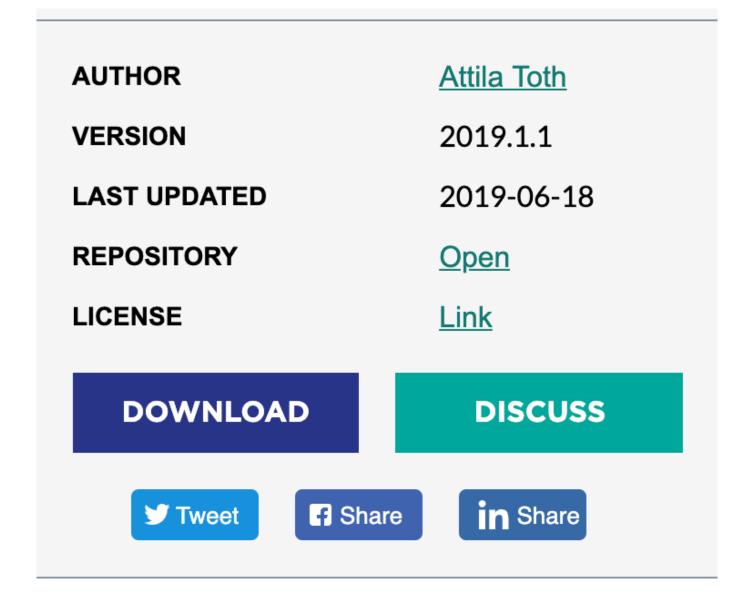

Preview

Yes! We introduced the feature to preview the app before sending it for approval. Finally)

Social Network Shares

We've introduced a set of social media buttons to let your application be shared easier on social networks and to let some extra traffic too.

AUTHOR	Attila Toth
VERSION	2019.1.1
