OpenWeathermap http error when making REST call

Hello ,

I am trying to make a REST call using the example given in documentation for Creating REST Services and Clients with Ensemble.

```
Class Test.REST.WeatherOperation Extends EnsLib.REST.Operation
```

But i receive below mentioned error. If anyone can help me out here.

```
ERROR <Ens>ErrGeneral: ERROR <Ens>ErrHTTPStatus: Received non-OK status 404 from remote HTTP server:
'HTTP/1.1 404 Not Found':<html>
<head><title>404 Not Found</title></head>
<body bgcolor="white">
<center><h1>404 Not Found</h1></center>
<hr><center>nginx</center>
</body>
</html>
```

Thanks,

Jimmy Christian.
