How to count how many keys are duplicated in global?

Hi there

Would you please advise how to count how many keys are duplicated in global, for example, **Athens was duplicate 3.**

```
Set ^Data("Cambridge") = "1"  
Set ^Data("New York") = "2"  
Set ^Data("Boston") = "3"  
Set ^Data("London") = "4"  
Set ^Data("Athens") = "5"  
Set ^Data("Athens") = "6"  
Set ^Data("Athens") = "7"
```

Thanks
