DeepSeeWeb add markers to line chart

I have this fact table

CheckTime	Error	Marker (1 or 0)
2019-01-01 00:01:00	1	0
2019-01-01 00:02:00	5	1
2019-01-01 00:03:00	2	0

And the cube which is pretty much 1:1.

I have build an MDX:

```
SELECT NON EMPTY [Measures].[Error] ON 0, NON EMPTY [CheckTime].[H1].[Minute].Members ON 1 FROM [CHECKCUBE]
```

Which produced this chart in DeepSeeWeb (there's obviously more data, but you get an idea):

However, I want to add a Marker - if it equals 1 then I need some indication on the chart, so the graph should look like this:

Is there a way to do that in DeepSee or DeepSeeWeb?
