# New Coding Talk: A SOLID Design in InterSystems ObjectScript

Hi Everyone!

Please watch the new video on [InterSystems Developers YouTube](#), recorded by [@ Sourabh Sethi](#) in a new format called ["Coding Talks"](#):

[A SOLID Design in InterSystems ObjectScript](#)

In this session, we will discuss a SOLID Principle of Programming and will implement it in the example.
We have used Caché Object Programming Language for examples. We will go step by step to understand the requirement, then what common mistakes we use to do while designing, understanding each principle and then complete design with its implementation via Caché Objects.

Additional resources:

- [CodeSet](#)
- [Presentation](#)

Also, check out the first part of ["Locking in InterSystems ObjectScript"](#) Coding Talk.

If you have any questions or suggestions, please write to [@ Sourabh Sethi](#) at [sethisourabh.hit@ gmail.com](#).

Enjoy watching this video! 👍
