Disable ENSEMBLE operation . Throw error

Hello Community,

How do i disable an operation explicitly based on a value in a variable?

I set the ReplyCodeAction to E=D.

In the Operation Code i am throwing an explicit ERROR

THROW ##class(%Exception.General).%New("Shutting Down Operation",999,,"My own special exception")

But my operation still remains up.

Any suggestions please will be appreciated.

Thanks,

Jimmy Christian.
