CodeGolf: FizzBuzz

Let's have a round of CodeGolf!

As usual the goal is to write the shortest solution for a specified problem.

Today we have one of the classics: FizzBuzz.

Write a program that prints the numbers from 1 to 100.

But for multiples of three print " Fizz " instead of the number and for the multiples of five print " Buzz " .

For numbers which are multiples of both three and five print " FizzBuzz "

To make output a little more readable (and code - more interesting) let's print only one number or word per line, so correct output should be:

Spoiler

It is produced by this unoptimized script:

Spoiler
