New Video: Leveraging an Open Analytics Platform

Hi Community!

New video is already on InterSystems Developers YouTube Channel:

Leveraging an Open Analytics Platform

Native analytics technologies and open, standards-based connectivity (for Spark, PMML, UIMA, and 3rd party tools) makes InterSystems IRIS an open analytics platform. This session provides examples of how our customers are meeting a wide range of analytics needs.

Takeaway: InterSystems IRIS is a complete platform for analytics with both built-in capabilities and support for third-party tools and technologies.
Presenter: @ Benjamin De Boe

Additional materials to the video you can find in this InterSystems Online Learning Course.

Enjoy watching the video! 👍
