DeepSee security issue

Hey Guys,

Have enabled DeepSee on my cache db via

```
Do EnableDeepSee^%SYS.cspServer(0)
```

I have created user with access to a profile with all the %DeepSee options (%DeepSeeAdmin, %DeepSeeAnalyzer etc etc) as well as %All. I have also added %All to unknownuser

When click the DeepSee page and choose a namespace Architect, Analyzer, Reporting Data Definition and Reporting Builder are all greyed out with 'you do not have privilege to view this page

[#InterSystems IRIS BI (DeepSee)](#)
