## New Coding Talk: Informative and Fast WEB API VIA ObjectScript and Ensemble/HealthShare

Hi Everyone!

Please watch the new video on [InterSystems Developers YouTube](#), recorded by [@Sourabh Sethi](#) in the "[Coding Talks](#)" format:

[Informative and Fast WEB API VIA ObjectScript and Ensemble/HealthShare](#)

Previous sessions are related to InterSystems ObjectScript:

1. [Locking in InterSystems ObjectScript](#)
2. [A SOLID Design in InterSystems ObjectScript](#)

This time, we are going to add a flavor Ensemble/Healthshare, to be informative and fast.

Web API can be REST or SOAP. In this session, we will take an example of SOAP. Everything that is demonstrated in this video will also be applicable for REST.

We will create 2 versions of the same API and will Compare there performance using a tool called SOAP UI and will collect performance metrics. We don't need to have a licensed version of SOAP UI for this session.

Pre-requisite: Basic knowledge of Ensemble and ObjectScript.

Additional resources:

- [Fast & Informative WEB API/Proxy](#)
- [Presentation](#)

If you have any questions or suggestions, please write to [@Sourabh Sethi](#) at [sethisourabh.hit@gmail.com](mailto:sethisourabh.hit@gmail.com).

Enjoy watching this video!
