intersystems Open exchange suggestion

I've just been tempted to the option exchange (curiosity) and when browsing, I often right-click, and open links in a new tab, eventually ;-) I have enough interesting open tabs to go off and read the tabbed articles,

I can't do this in open exchange, it will only allow a direct click to open the url.

even worse, when I come back (to where I left off) It starts from the top of the page.

any chance of changing the url's to allow us to right click and open in a new tab

I'm guessing that this applies to may other URL's around the intersystems community, but it's the first time it annoyed me.

kev
