## Durable %SYS Directory for Caché/Ensemble ?

IRIS offers [Durable %SYS Directory](#) as a highly useful feature for working with containers.

Before inventing the wheel once more I'd like to know if a similar feature also exists for Caché / Ensemble.

Official documentation is quite silent about.

Though I have some names in mind that might know more about ( [@Luca Ravazzolo](#) ? [@Dmitry Maslennikov](#) ? [@Eduard Lebedyuk](#) ? )

[#Containerization](#) [#Docker](#) [#Caché](#) [#Ensemble](#)
