Data Management & Analytics at Global Summit

Hi,

I'm sure I'm not the only one who's already assembling matching pairs of socks for this year's [Global Summit](#) in Boston later this month 🙂. In case you haven't registered yet or are still looking for the right justification to get the eventual approval to attend, here's a quick overview of all the sessions around Data Management and Analytics:

Data Management & Analytics @ Global Summit

Monday		Tuesday		Wednesday	
13:30	Rapid Intelligent Application Development	13:30	An ML Toolkit for InterSystems IRIS [partner]	11:00	Scaling up and out with InterSystems IRIS
	The ML Toolkit on OpenExchange [XP lab]	14:30	Rapid Intelligent Application Development		UX Feedback: Focus on BI [interactive]
14:30	BI and Analytics Roadmap	15:30	SQL Performance: Need for Speed		The ML Toolkit on OpenExchange [XP lab]
15:30	SQL Performance: Need for Speed	16:30	Scaling up and out on InterSystems IRIS	12:00	An ML Toolkit for InterSystems IRIS [partner]
	AI & ML Roundtable [partner]		Introducing Analytic Workflows		
16:30	NLP in Healthcare: Real-world Use Cases [partner]		Using AI Services to Build Intelligent Apps [XP lab]	13:30	Artificial Intelligence & Machine Learning Symposium [partner]
	Using AI Services to Build Intelligent Apps [XP lab]				

There's a great number of partners joining us on stage to talk about their experiences with analytics and ML, plus an entire Wednesday afternoon devoted to AI and Machine Learning with even more outside speakers, including from ClosedLoop, Wayfair and DataRobot.

And in case you're looking for ways to fill the gaps in between the sessions listed above, check out the [full session grid](#) here!
