BS FTP error waiting for files

Hello everyone,

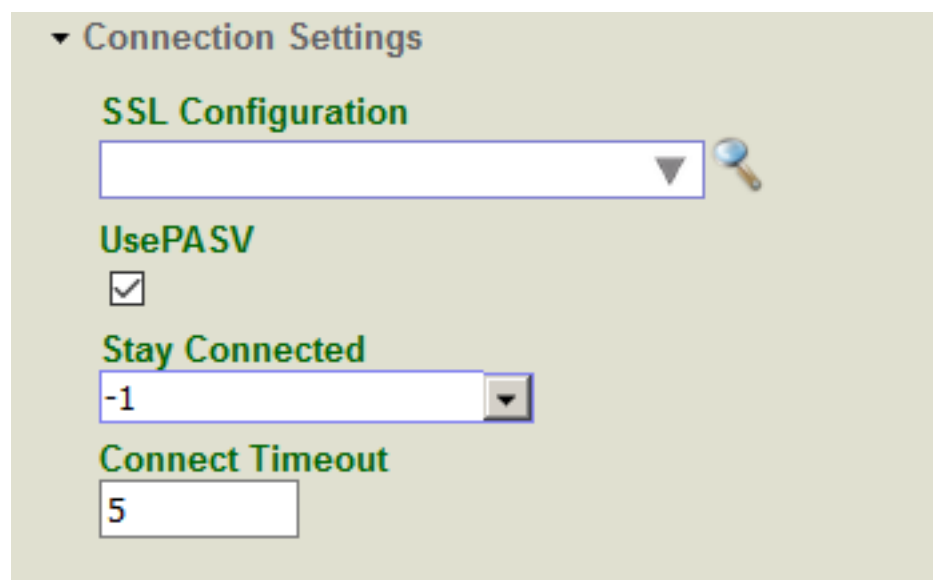

We have a process that is listening to an FTP service to collect some CSV files and process them. The process works correctly and when it ends it clears the directory waiting for it to enter some other file.

We have been receiving the following error message for a long time:

```
ERROR <Ens>ErrGeneral: Error in SFTP Dir() ERROR #7500: Error DirEnum SSH '-2146430967': 'SSH Error [80101009]:  
Would block waiting for status message [80101009] at SFTP.cpp:150,0
```

This happens when there are no files to process and appears from time to time, maybe every 20 minutes.

The adapter configuration is as follows:

The screenshot shows a 'Connection Settings' dialog box with the following configuration:

- SSL Configuration:** A dropdown menu is set to an empty state, with a magnifying glass icon to its right.
- UsePASV:** A checkbox that is checked.
- Stay Connected:** A dropdown menu is set to '-1'.
- Connect Timeout:** A text input field containing the value '5'.

▼ **Additional Settings**

Schedule
 ▼ 

Pool Size

Use FileStream
☐

Server List Style
 ▼

Subdirectory Levels

Charset
 ▼

Append Timestamp

Confirm Complete
 ▼

File Access Timeout

Semaphore Specification

Use Single Session
☐

HeaderCount

SynchronousSend
☐

Generate SuperSession ID
☐

Throttle Delay

The class that is used is extended from `EnsLib.RecordMap.Service.FTPService` and the `OnProcessInput` method has been overwritten to control the records instead of processing each of the records in the Business Process.

BS FTP error waiting for files

Published on InterSystems Developer Community (<https://community.intersystems.com>)

This error message is being given before processing anything, since there are no traces that indicate that you have entered this method, so I think it has to be something else or some configuration.

Any clue as to why you are giving this random error message?

Best regards,

Francisco Lopez
