## New Video: Making Cloud Deployments Cost Effective

Hi Community!

New video is already on [InterSystems Developers YouTube Channel](#):

[Making Cloud Deployments Cost Effective](#)

One of the promises of cloud technology is cost-effectiveness. We will show you how to cash in on that promise, using ephemeral storage (local instance storage), mirroring, and ECP to provide a low cost cloud deployment without sacrificing performance or availability.

Takeaway: InterSystems provides technology that enables me to deploy cost-effectively in the cloud.

Presenter: [@Mark Bolinsky](#), InterSystems Senior Technology Architect

Additional materials to the video you can find in this [InterSystems Online Learning Course](#).

Enjoy watching the video!
