Question Mathieu Van Sevenant · Sep 13, 2019

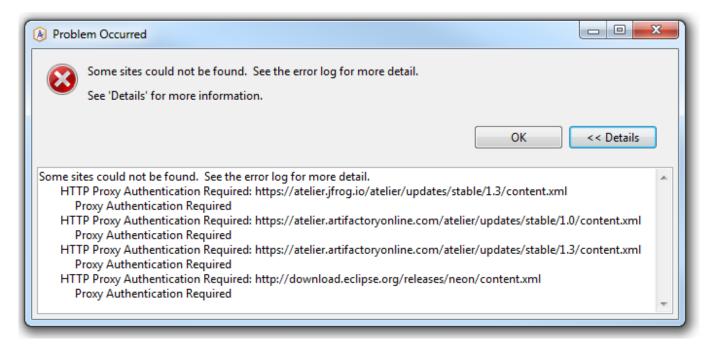

Updating Atelier - Sites not found & Proxy Authentication

Hello everyone :-)

I would like to update Atelier from version 1.0.262 to the 1.3 one. So I clicked on Help --> Check for updates, and I get these first error messages:

"No updates were found in available software sites."

"Some sites could not be found. See the error log for more detail." etc. cf picture below talking about Proxy Authentication.

So I checked those available software sites (tried until now) and also the proxy settings that I am used to work with:

Updating Atelier - Sites not found & Proxy Authentication Published on InterSystems Developer Community (https://community.intersystems.com)

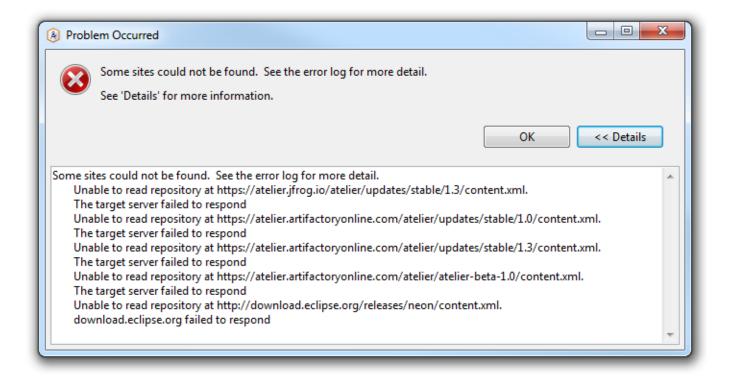

Preferences				
type filter text	Available Software Sites			<> ▼ → ▼ ▼

0			ОК	Cancel

Preferences type filter text		Network Conne	ections							
▲ General		Active Provider: Native Proxy entries								
 Editors Globalization Keys Network Connections Perspectives Search Security Startup and Shutdown Ul Responsiveness Monitoring 	II	Schema HTTP HTTPS SOCKS HTTP Proxy bypass	Host Dynamic	Port	Provider Manual Manual Manual Native	Auth No No No	User	Password	Clear	
Web Browser Welcome ▷ Workspace ▷ Atelier ▷ Dynamic Languages		Host Provider Iocalhost Manual 127.0.1 Manual						Add Host Edit Remove		
Help Install/Update	Ŧ							Restore Defaults	Apply Cancel	

Then I changed the "Active Provider" from Native to Manual with the proxy settings got from a system administrator :

	Netw	ork Con	nections				¢	• 0	÷ • •
✓ General ▷ Appearance Compare/Patch Content Types	Active Provider: Manual								
 Editors Globalization 		Sche HTTP	Host	Port	Provi Man	Auth No	User		Edit
Keys Network Connections		HTTPS	-		Man	No			Clear
Perspectives Search		SOCKS HTTP	Dynamic	Dyna	Man Native	No No			
 Security Startup and Shutdown UI Responsiveness Monitoring 	•							•	
Web Browser Welcome	Proxy bypass								
 Workspace Atelier 		Host			Provider			Add Host	
Ateller Dynamic Languages	V				Manual			Edit	
 Install/Update Run/Debug 		127.0.0.1	l	1	Manual			Re	emove
▷ Team					Rest	ore Defa	ults	A	oply
?						ОК		Car	ncel

So here is the result of a new try of "Check for updates": "Unable to read repository at {any site name}/content.xml. The target server failed to respond" :

Do you know where it could come from ?

In any case it could be useful, here is a last picture of details about my current version of Atelier:

Atelier Installation Details Installed Software Installation History Features Plug-ins C	Configuration
