Error to load IAM image

Hi folks,

I started to play with docker and InterSystems products, it's amazing, but I got the error when try to load the IAM-0.34-1-1.tar.gz image to docker:

```
[root@CONF-RHEL-DOCKER-IRIS-API admconf]# docker load -i IAM-0.34-1-1.tar.gz
open /var/lib/docker/tmp/docker-import-547148651/IAM/json: no such file or directory
```

Bellow docker and docker-compose version:

```
[root@CONF-RHEL-DOCKER-IRIS-API admconf]# docker --version
Docker version 19.03.2, build 6a30dfc
```

```
[root@CONF-RHEL-DOCKER-IRIS-API admconf]# docker-compose --version
docker-compose version 1.18.0, build 8dd22a9
```

OS version (Azure VM)

```
[root@CONF-RHEL-DOCKER-IRIS-API admconf]# hostnamectl
Static hostname: CONF-RHEL-DOCKER-IRIS-API
    Icon name: computer-vm
    Chassis: vm
    Machine ID: 320fc5cd279b42febd7a45857a46a325
    Boot ID: 11e22f932fe140bea03cf43a46e7d1c0
    Virtualization: microsoft
    Operating System: Red Hat Enterprise Linux Server 7.6 (Maipo)
    CPE OS Name: cpe:/o:redhat:enterprise_linux:7.6:GA:server
    Kernel: Linux 3.10.0-957.27.4.el7.x86_64
    Architecture: x86-64
```

Someone experimented these issue?

Regards.
