[October 15, 2019] Upcoming Webinar in Spanish: Developing and managing APIs with InterSystems IRIS Data Platform

Hi Community!

We are pleased to invite you to the upcoming webinar in Spanish "[Desarrollar y gestionar APIs con InterSystems IRIS Data Platform](#)" / "[Developing and managing APIs with InterSystems IRIS Data Platform](#)" on October 15 at 16:00 CET!

Desarrollar y gestionar APIs con InterSystems IRIS Data Platform

Are you a backend developer? Or a Systems integration specialist? If so, this webinar is for you!

What you will learn:

- We'll develop an API REST from OpenAPI (Swagger) specifications and we'll also see how to expose in JSON format the objects stored in our database.
- We'll show how to manage our API, considering the management of tokens for API consumers, monitoring activities, how to establish controls to restrict API use for traffic and how to release new versions.

We'll publish the examples in GitHub and we'll use Docker and Visual Studio Code images.

We are waiting for you! 👍
