[November 7, 2019] Webinar: AI Robotization (Python, R, Interoperability) for InterSystems IRIS

We're back with more AI, more ML and more presenters!

We are pleased to invite you to the upcoming webinar in English: [AI Robotization \(Python, R, Interoperability\) for InterSystems IRIS](#) on November 7 at 11:00 EST!

The banner features a collage of images related to technology and healthcare. On the left, there are several small line graphs showing data trends. Below them is a stack of colorful shipping containers. In the center, a person in blue scrubs is using a tablet. On the right, there are three video call windows showing the speakers: Anton UMNikov, Eduard LEBEDYUK, and Sergey LUKYANCHIKOV. A large 'REGISTER!' button is prominently displayed in the center-right. The InterSystems logo is in the top right corner. The background includes server racks and circuit boards.

AI Robotization (Python, R, Interoperability) for InterSystems IRIS
A webinar on November 7th, 2019 at 11:00 am EST (Boston)

Anton UMNIKOV, Senior Cloud Solution Architect, InterSystems
Eduard LEBEDYUK, Sales Engineer, InterSystems
Sergey LUKYANCHIKOV, Sales Engineer, InterSystems

REGISTER!

Machine Learning (ML) Toolkit is a suite of extensions for Machine Learning and Artificial Intelligence in-platform with InterSystems IRIS. During this webinar we will present an approach to robotizing AI/ML, i.e. making it run autonomously and adaptively within constraints and rules that you define. Self-learning neural nets, self-monitored analytical processes, agent-based systems of analytical processes and distributed AI/ML computations – are all the topics to expect in our webinar.

Three demos are on the agenda:

- Realtime predictive maintenance
- Self-monitored sentiment analysis
- Distributed AI/ML computations involving cloud services

The webinar is for expert audience (Data Science, Data Engineering, Robotic Process Automation) as well as for those that discover the world of data science. As a preparation, we would recommend revisiting our [previous webinar 's recording](#)

Time: Nov 7, 2019 11:00 AM in Eastern Time (US and Canada)
