Error importing file for CSV Wizard

I'm trying to create a new Record Map but I keep getting a ZEN Exception error. I actually go this to work the very first time I did it and have a record map. But I need to do more.

I'm working on my local machine so I can grab a CSV (or txt in this case as it's pipe delimited) from the local directory. I pick the file I want to use but when I click OK i get a popup and the following error:

ZEN EXCEPTION

[http://localhost:52773/csp/healthshare/aarondb/%25ZEN.Dialog.fileSelect.zen?\\$ZENPOPUP=1&\\$ZENSOFTMODAL=1&Dir=C%3A%5CInterSystems%5CHealthConnect%5CMgr%5CTemp%5C&wildcard=*.csv](http://localhost:52773/csp/healthshare/aarondb/%25ZEN.Dialog.fileSelect.zen?$ZENPOPUP=1&$ZENSOFTMODAL=1&Dir=C%3A%5CInterSystems%5CHealthConnect%5CMgr%5CTemp%5C&wildcard=*.csv)

A JavaScript exception was caught in function function
SecurityError: Permission denied to access property "update" on cross-origin object

=====

Stack trace:

```
js:zenExceptionHandler(SecurityError: Permission denie..., [object Arguments])
