## how to store location lat, long with patient creation using FHIR R4 resources

Hi,

I am new to FHIR resources here i need to store patient current location with patient resource but location resource does not linked with patient. I need help this. In FHIR R4 resources having separate i implemented successfully in my project but i am suffered how to link location and patient. I found resources from <https://www.hl7.org/fhir/resourcelist.html>

My Code implemented by nodejs with typescript language here i added graphql instead of rest

[#FHIR](#) [#Node.js](#) [#Other](#)
