Google Cloud IRIS Health Community Edition, where is iris?

Hi all, New user here. I have an instance of Google Cloud Iris Health Community Edition running and am logged in on terminal. I follow the instructions for Google Cloud IRIS Health Community Edition. How do I get to iris? iris status yields nothing, there is no /bin/iris and sudo docker ps -a shows no containers but there probably is a iris container somewhere on the instance? 'Visit the site' yields ERR_CONNECTION_REFUSED

[#GCP](#) [#InterSystems](#) [IRIS for Health](#)
