## InterSystems IRIS and IRIS for Health 2019.1.1 now available

The 2019.1.1 versions of InterSystems IRIS and IRIS for Health are now Generally Available!

These are maintenance releases in the EM (Extended Maintenance) stream. The changes are reflected in the 2019.1 documentation, which is available online and features a new look including a card-style TOC layout.

The build number for these releases is 2019.1.1.612.0. A full set of kits and containers for both products are available from the [WRC Software Distribution site](#), including community editions of InterSystems IRIS and IRIS for Health.

This release also adds support for Red Hat Enterprise Linux 8, in addition to the previously supported platforms detailed in the [2019.1 Supported Platforms document](#).

InterSystems IRIS Data Platform 2019.1.1 includes maintenance updates in a number of areas, as described in the online documentation [here](#).

It also includes three new features, described in the online documentation [here](#):

- Support for the InterSystems API Manager
- X12 element validation.
- In-place conversion from Caché and Ensemble to InterSystems IRIS
