Health Connect 2019.1.1 now available

The 2019.1.1 version of HealthShare Health Connect 2019.1.1 is now Generally Available!

This release includes maintenance updates in a number of areas, as described in the online documentation here.

It also includes two new features, described in the online documentation here:

- Support for InterSystems API Manager
- X12 Element Validation in Interoperability Productions
- In-Place Conversion from Ensemble - based Health Connect (version 15.03) to Intersystems IRIS - based Health Connect

The build number for these releases is 2019.1.1.612.0. A full set of kits is available from the WRC Software Distribution site. Health Connect is also available in an OCI (Open Container Initiative) a.k.a. Docker container format

This release also adds support for Red Hat Enterprise Linux 8, in addition to the previously supported platforms detailed in the 2019.1 Supported Platforms document
