New Global Summit 2019 Video: Introduction to Kubernetes

Hi Developers,

The new video from Global Summit 2019 is already on [InterSystems Developers YouTube](#):

[Introduction to Kubernetes](#)

Kubernetes is an open-source container orchestration system for automating application deployment and management. This video provides a light introduction to Kubernetes concepts. The main focus will be on those components of the platform (such as storage, network, and configuration) that relate to InterSystems IRIS. To get the most out of this video, you should be familiar with containers.

Takeaway: You will gain a basic understanding of the Kubernetes platform and those components that are necessary for a database app to function appropriately with regards to performance, resiliency, and security. You will be aware of the GitHub link that will allow them to start investigating the Kubernetes platform.

Presenters:

[@Luca Ravazzolo](#), Product Manager, InterSystems

[@Jim Howell](#), Software Architect, [Ontario Systems](#)

Additional materials to this video you can find in this [InterSystems Online Learning Course](#).

Check out the [Cloud Deployment Resource Guide](#).

Enjoy watching this video!
