## Connect Oracle with InterSystems

Hello everyone,

It is my first post in the community. Very recently I started working using IRIS, creating services with Cache. Today they gave me a new task and I'm really lost.

How can I use an oracle database to create services using iris?

Throughout the day I was looking for a guide to use a remote Oracle database. but unfortunately I only managed the connection in SQL Gateway

[#Application Server](#) [#Oracle Enterprise Linux](#) [#SQL](#) [#InterSystems IRIS](#)
